Power Angle Plow

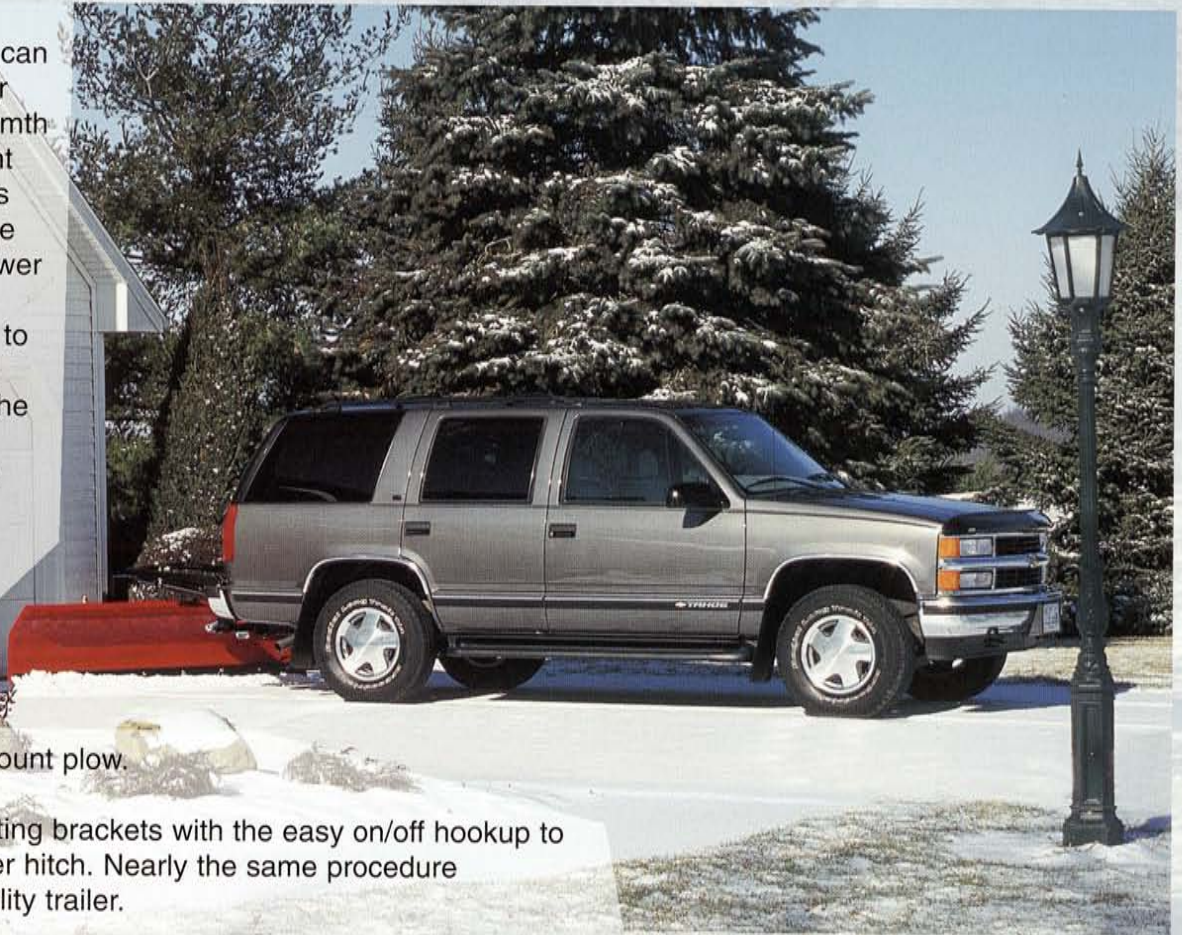

The Future of Snow
Removal is Behind You!

SNOWMAN SNOWPLOW™

The SUV and Light Truck Snowplow

ELIMINATE DAMAGE TO VEHICLES NOT BUILT FOR HEAVY FRONT MOUNT PLOWS

Now homeowners can clear their drives or lanes from the warmth of their SUV or light duty truck. Vehicles are built to pull. The Snowman LDA Power Angle models are specially designed to work with your vehicle by pulling the snow rather than pushing. Using the Snowman Power Angle pull plow eliminates the risk of front-end damage to the vehicle from increased axle weight of a front mount plow.

No unsightly mounting brackets with the easy on/off hookup to a 2" square receiver hitch. Nearly the same procedure as hooking up a utility trailer.

The Snowman LDA plow has spring down pressure to scrape the surface cleaner than conventional front plows. The spring down pressure also allows the plow to follow the contour of steep drives and lanes better.

"I purchased a Snowman Model 75 LDA and mounted it into the existing receiver hitch on my Ford 250 4x4. I use only my Snowman power angle plow to clear a clean path to the end of my 1/4 mile uphill drive. I can back up to a building and pull the snow away, and the spring down pressure works great! This is the 3rd season that I have used my Snowman plow and I am very satisfied with both quality and performance."

Jack Page - WI
(Near the northern border of Wisconsin. Average
snowfall 150+ inches per season)

Snowman Model LDA General Specifications

Blade Width	Blade Height	Gauge	Approx. Wgt.	Braces	Approx. To End Of Plow	Trip Springs	Required Hitch Class	Standard Box Wings	Standard Jack Stand	Spreader Compatible
